Certificate No: - TERA/CERT-IN/03/2026/CR/16	Date: - 12-03-2026

Report ID:- TTPL/Certin/PR/26/03/SCR/PN/S001/v2.0

SECURITY AUDIT CERTIFICATE

(Source Code Review)

Application / Project Name	JMDT Decentralized Node (JMDN) Source Code Review JMDN.zip
Code MD5	508a6dc5f7061a27a0344c504aea9116
Auditor Name	Rashmi J

This is to certify that the above-mentioned application has undergone a comprehensive Source Code Security Review in accordance with industry best practices, including OWASP Secure Coding Guidelines, CERT Secure Coding Standards, and applicable regulatory requirements.

SCOPE OF AUDIT

Audit Type	Source Code Review
Code Base Languages	Go (Golang)
Lines of Code Reviewed	69,000
Audit Period	24/02/2026 To 06/03/2026
Issue Date	12/03/2026

AUDIT METHODOLOGY

No.	Methodology Point
1	Input validation and sanitization
2	Authentication and authorization controls
3	Session management security
4	Data encryption and storage practices
5	Error handling and logging mechanisms
6	Secure use of third-party libraries and APIs
7	Protection against OWASP Top 10 vulnerabilities
8	Business logic security flaws

CERTIFICATION STATEMENT

Based on the audit conducted and the remediation verified, the application is found to be free from known critical and high-risk vulnerabilities as of the date of this certificate. This certification is six month valid only for the reviewed version of the source code and does not guarantee future security against emerging threats.

Disclaimer: This certificate is issued based on the source code provided for review. It is not a warranty or guarantee of absolute security and should be considered in conjunction with ongoing security maintenance.
